

PhD Marco A. Lopez-Sanchez

Short bio: I am a postdoctoral researcher at [Géosciences Montpellier - CNRS](#) in France. I hold a *PhD* in Geology from the University of Oviedo in Spain. In the past, I combined jobs outside the academy as a geology teacher and freelance geologist with postdoctoral training in [Sergio Llana-Fúnez](#) research group. Since the beginning of 2018, I have been working with [Andréa Tommasi](#) in the *Manteau et Interfaces* research group in Montpellier, where my research focuses on the characterisation of microstructure and texture during deformation and annealing processes using in-situ monitoring. Although in the past I worked mainly with quartz-feldspathic rocks, the materials I currently work with are olivine, ice, and magnesium.

My research interests include different aspects of geodynamic processes from the microscopic to the orogenic scale. My primary interests include rock deformation and rheology, crustal-scale shear zones, crustal strength modelling, characterization of rock microstructure/texture through EBSD and image analysis, and understanding strain localization in nature. Other interests are the evolution of ancient orogens, the interaction between rock deformation, fluids and metamorphism, and the establishment of the absolute time at which deformation processes occur. I also enjoy programming for data analysis and other cool [things](#).

Personal details

Full name: Marco Antonio López Sánchez

Work address:

Géosciences Montpellier - CNRS
Université de Montpellier
Campus Triolet cc060
Place Eugène Bataillon
34095 Montpellier Cedex05
France
Tel: (33) 4 67 14 30 64

e-mails:

At Géosciences Montpellier: [link](#)

Education

Jul 2013 - *PhD* in Geology, *cum laude* honours, [Department of Geology](#), [Univ. of Oviedo](#).

Advisor: Sergio Llana-Fúnez. Co-advisors: Profs. Alberto Marcos and Francisco J. Martínez

Thesis: *Análisis tectónico de la Falla de Vivero (Galicia, NW of Spain)*

Sep 2007 - DEA (Masters of Science - *M.Sc.*) in Geology, Department of Geology, University of Oviedo. Project advisor: Prof. A. Marcos

Jan 2006 - Bachelor of Science (*B.Sc.*) in Geology, Department of Geology, University of Oviedo.

Research

Professional experience (only academic related)

2018 - present - Postdoctoral researcher, Géosciences Montpellier, Université de Montpellier

2015 - 2017 - Postdoctoral researcher, Dpto. de Geología, Universidad de Oviedo

2013 - 2015 - Research assistant (non-paid volunteer), Dpto. de Geología, Universidad de Oviedo

2007 - 2013 - *PhD candidate*, Departamento de Geología, Universidad de Oviedo

Fellowships/Awards

2017 - Postdoctoral fellowship [Clarín-COFUND](#) (Marie Skłodowska-Curie Actions 7th FW) (2 years)

2017 - [Marie Skłodowska-Curie Actions Seal of Excellence Award with the research project proposal IDEA](#)

2016 - Early Career Scientist's Travel Award for EGU General Assembly 2016

2007 - Predoctoral fellowship in the Severo Ochoa Program (FICYT, Principality of Asturias, Spain) (4 years)

Scientific activities as visitor researcher

2019 - **Grenoble (France)**. Duration: 1.5 months. Experimental ice deformation (creep) using digital image correlation methods at [Institut des Géosciences de l'Environnement](#) under the supervision of [Maurine Montagnat](#).

2018 - **Saint-Étienne (France)**. Duration: 1 week. High temperature experimental deformation of magnesium alloys in a channel-die compression rig at [École des Mines de Saint-Étienne](#) (collab. R. Quey).

- 2011 - **López-Sánchez MA**, Llana-Fúnez S, Martínez FJ and Marcos A. Microstructural Evolution in Quartz and Feldspar During Medium T Deformation (Vivero Fault, NW Spain) (Poster). *The Interrelationships Between Deformation and Metamorphism*
- 2011 - **López-Sánchez MA**, Marcos A, Martínez FJ and Llana-Fúnez S. Hangingwall Metamorphism Related to an Extensional Orogen-scale Shear Zone: The Vivero Fault (NW of Spain) (Poster). *The Interrelationships Between Deformation and Metamorphism*
- 2010 - **López-Sánchez MA**, Marcos A, Martínez FJ and Llana-Fúnez S. Microstructures from the footwall to the hangingwall in the Viveiro Shear Zone (NW of Iberian Peninsula) (**Oral - by invitation**). *Sociedade Geológica de Portugal, VIII Congresso Nacional de Geología*.
- 2009 - **López-Sánchez MA**. Deformation partitioning patterns and metamorphism of the Viveiro shear zone (Guntín, NW of Iberian Peninsula) (Poster). *Deformation, Rheology and Tectonics meeting (Liverpool)*

Selected scripts & codes

GrainSizeTools: A free and open-source Python script for estimating the grain size from thin sections

Developed and maintained by **Lopez-Sanchez MA** (stable)

Info. & download: <http://marcoalopez.github.io/GrainSizeTools/>

mtex_scripts: matlab scripts for use with the MTEX toolbox

Developed and maintained by **Lopez-Sanchez MA** (under development)

Info. & download: https://github.com/marcoalopez/mtex_scripts

Strength envelopes: A Python script to generate crust and lithosphere strength envelopes

Developed and maintained by **Lopez-Sanchez MA** (under development)

Info. & download: https://github.com/marcoalopez/Strength_envelopes

JASPE: *Just Another Stereoplot (in a) Python Environment*

Developed and maintained by **Lopez-Sanchez MA** (under development)

Info. & download: <https://github.com/marcoalopez/JASPE>

Nearest neighbour: A Python script to estimate nearest neighbour distance and perform nearest neighbour Monte Carlo simulations

Developed and maintained by **Lopez-Sanchez MA** (stable)

Info. & download: https://github.com/marcoalopez/nearest_neighbour

Image analysis: Python code snippets for image analysis

Developed and maintained by **Lopez-Sanchez MA** (under development)

Info. & download: https://github.com/marcoalopez/image_analysis

Chemical age script: A free and open-source script to estimate the 'chemical' ages in monazites analyzed in electron microprobes

Developed by **Lopez-Sanchez MA** (currently abandoned)

Info. & download: https://github.com/marcoalopez/chemical_age_script/

Selected training courses

2018 - *Thematic School – Recrystallization Mechanism in Materials*

Duration: 3 days, Saint-Étienne, France

Coordinator: Maurine Montagnat

Organized by the CNRS "Groupement de Recherche" on Recrystallization (GDR3436)

2016 - *Thematic School – Recrystallization Mechanism in Materials*

Duration: 5 days (32 hours), Sète, France

Coordinator: Maurine Montagnat

Organized by the CNRS "Groupement de Recherche" on Recrystallization (GDR3436). [Certificate](#)

2015 - *Introduction to R Programming*

Duration: 10 hours

Instructor: Filip Schouwenaars

Microsoft edx course (DAT204x). [Certificate](#)

2013 - *Introduction to computer science and programming using Python*

Duration: 210 hours

Prof. Eric Grimson, Prof. John Guttag, Dr Chris Terman and Dr Larry Rudolph

Massachusetts Institute of Technology edx course (MITx - 6.00x). [Certificate](#)

2012 - *Scanning Electron Microscopy and its applications to analyses of Rocks*

Duration: 30 hours

Prof. John Wheeler, Dr Elisabetta Mariani and Dr Dan Tatham

Department of Earth, Ocean and Ecological Sciences, University of Liverpool

2008 - *Training course in microtectonics*

Duration: 30 hours

Prof. Cees W. Passchier

Institut für Geowissenschaften; Johannes Gutenberg-Universität Mainz (Germany).

Analytical/technical skills

- **Scientific computing and programming.** Wide experience using [Python](#) programming language and the scientific libraries [Numpy](#), [Scipy](#), [Matplotlib](#), and [Pandas](#). I am also familiar with the basics of [R](#) and [Matlab](#), version control systems such as Git, and code repositories such as GitHub.
- **Image acquisition and analysis.**

- Good theoretical background and practical experience with cameras and digital image acquisition. [Dcraw](#) knowledge (for raw image extraction).
- Experience using [ImageJ](#) and [Scikit-Image](#) (Python library) for image analysis, as well as developing my own codes. Noise reduction, image enhancement, grain segmentation, shape descriptors, grain size, and spatial analysis. For **grain size analysis** I use my own tools/scripts. See an example in <http://marcoalopez.github.io/GrainSizeTools/>
- Experience with **Digital Image Correlation** (DIC) methods. Generation and quality analysis of speckle patterns (via image autocorrelation). DIC software's used: [DICE](#), 7D and [DICToolbox](#).
- **Experimental deformation.** Experience in experimental deformation including in-situ monitoring. Experience in sample preparation (ice, magnesium, rocks). Basic experience with LabVIEW engineering software. Welding skills.
- **Scanning Electron Microscopy** (BSD, **Backscatter diffraction - EBSD**) data treatment.
 - **Wide experience using the MTEX Matlab toolbox.** I contributed to the MTEX through community scripts. See also https://github.com/marcoalopez/mtex_scripts
 - Others: *AZtechKL/Channel 5*, *PFch5 script*, and own codes.
- **Electron Probe Micro-analyser** (EPMA). Including monazite chemical dating (see https://github.com/marcoalopez/chemical_age_script)
- Good theoretical background in interpreting experimental data (i.e. statistics, interpolation and regression)
- Experience in geological mapping and **Geographical Information Systems** (GIS)
- U-Pb geochronological data treatment

Participation in Research Projects

2018 - present ANR DREAM - Dynamic REcrystallization in Anisotropic Materials. Project led by Maurine Montagnat. Ref. *ANR-13-BS09-0001-01*

2016 - 2017

Cataclasis y fracturación en rocas de la corteza continental (*Cataclasis and rock fracturing in the continental crust*). Project led by [Sergio Llana-Fúnez](#) Ref. *MINECO-15-CGL2014-53388-P*

2015

Procesos geológicos modeladores del relieve de la cordillera cantábrica. Project led by [Sergio Llana-Fúnez](#) Ref. *FC-15-GRUPIN14-44*

2010 - 2014

La transición frágil-dúctil de la corteza del NO peninsular (*The brittle-ductile transition in the continental crust in North-western Iberia*). Project led by [Sergio Llana-Fúnez](#) Ref. *MICINN-10-CGL2010-14890*

2007 - 2010

The tectonic evolution of an orogen in the transition between the internal and external zones: A comparison between the Variscan orogen in the NW of Iberian Peninsula and the Pyrenean Axial Zone (original title in Spanish). Project led by Alberto Marcos. Ref. *CGL2006-08822/BTE*

Teaching (at university level)

Accredited as an assistant teacher by the National Agency for Quality Assessment and Accreditation of Spain (ANECA) in 2016

Graduate teaching assistant from **2009** to **2011** and in **2017** at Universidad de Oviedo

Laboratory sections taught: *Plate Tectonics (30 hours); Structural Geology (20 hours); Geophysical and Geochemical prospecting (10 hours); Interpretation of geological maps (10 hours)*

Field Camp taught: *Geodynamics (10 hours); Structural Geology (10 hours); Fieldwork (geological mapping) (12.5 hours); Tectonics (10 hours); Structural analysis (5 hours)*

Administrative experience

Deformation mechanisms, Rheology and Tectonics (DRT2011) meeting organizing committee. DRT meetings are a series of biannual international meetings dedicated to the study of deformation processes in rocks at different scales, from the microscale to the study of bulk deformation of the lithosphere

Languages

Spanish and Galician - mother tongue

English - fluent

French and Portuguese - assez pour me faire comprendre et survivre! :)
